Tasks

Attention! Actual practices may differ from those presented below, as Microsoft continuously develops features. For up-to-date information, refer to Microsoft's website.

Go from data to insight to action with Power BI Desktop

Create rich, interactive reports with visual analytics at your fingertips—for free.

Download free >

See download or language options >

Task 1 - Install Power BI Desktop

With Power BI Desktop, you can:

1. Connect to data, including multiple data sources.
2. Shape the data with queries that build insightful, compelling data models.
3. Use the data models to create visualizations and reports.
4. Share your report files for others to leverage, build upon, and share. You can share Power BI Desktop .pbix files like any other files.

Power BI Desktop can be found via a direct download link at **Power BI**, or by installing it as an app from the **Microsoft Store**. There are several benefits of using the **Microsoft Store Power BI Desktop app**, including automatic updates, no requirement for admin privileges, and making it easier for a planned IT rollout of Power BI.

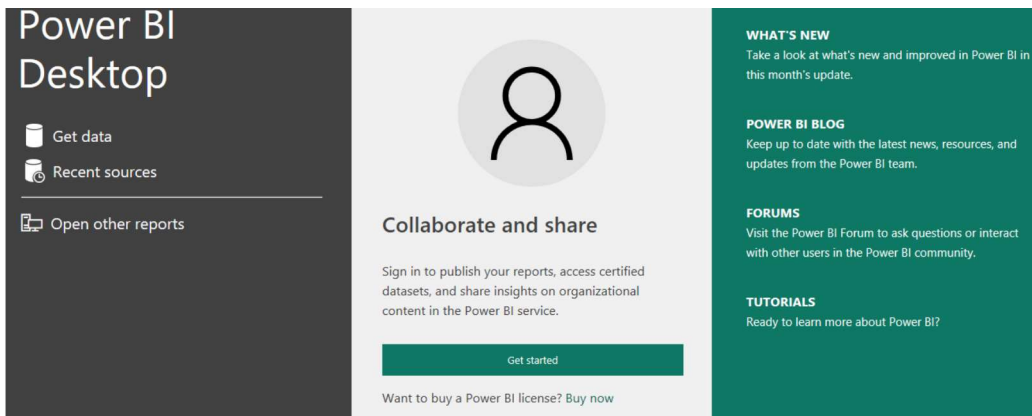

Step 1: Open **Microsoft Store** and search for *Power BI Desktop*.

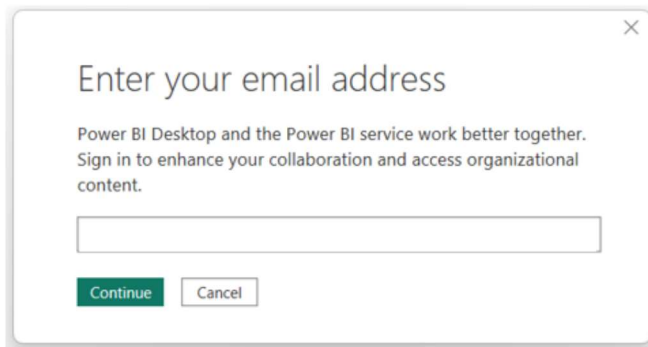

Step 2; Click **Get in Store app** button. The download starts.

Step 3: When the download and installation is finished, click **Open**.

Step 4: In the starting window, click **Get started**.

Step 5: In the **Enter your email address** window, click **Cancel**.

Step 6: The **Power BI Desktop** is ready to use.

Task 2 - Sign up for the Power BI service as an individual

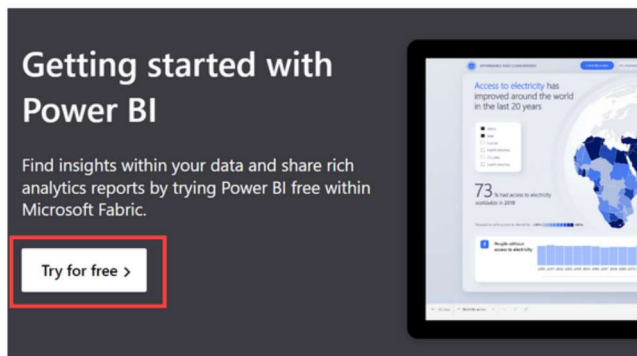

The Power BI service offers both free and paid license options. Paid options include Power BI Pro and Power BI Premium Per User (PPU).

The exact steps for signup vary depending on your organization and what you select to start the process. There are many different ways to sign up for the Power BI service as an individual, and the steps in this lesson apply to one of the most common.

Note! **Power BI** requires that you use a **work or school email address**. You can't sign up or purchase using email addresses provided by consumer email services or telecommunication providers.

Follow these steps to sign up for a Power BI service account. Once you complete this process you will have a Power BI (free) license which you can use to try the Power BI service on your own using My Workspace, consume content from a Power BI workspace assigned to a Power BI Premium capacity, or initiate an individual Power BI trial.

Step 1: Select **Try free** from <http://powerbi.microsoft.com>. You may then be prompted to select **Try Power BI for free**.

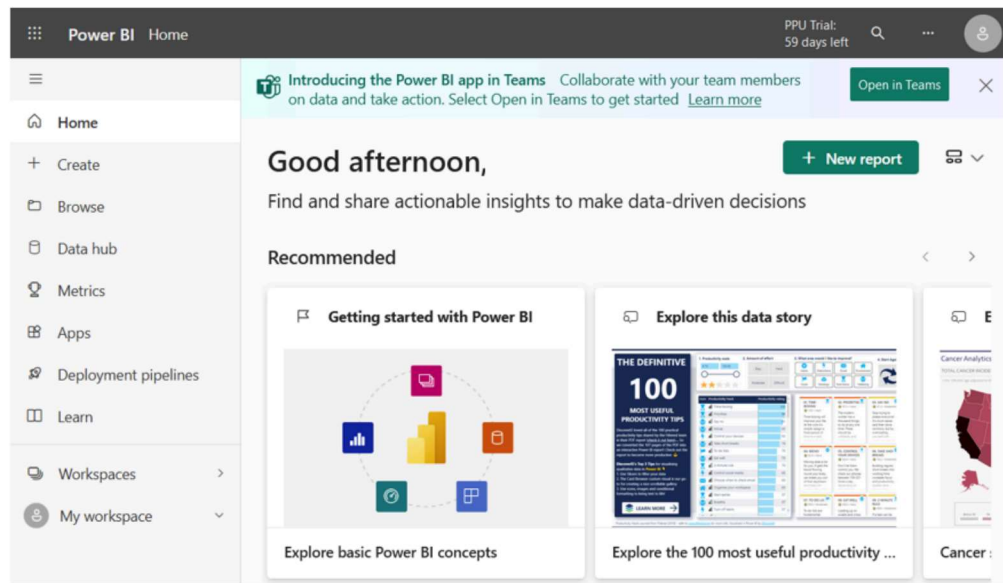

Step 2: When prompted, sign in using your organizational account.

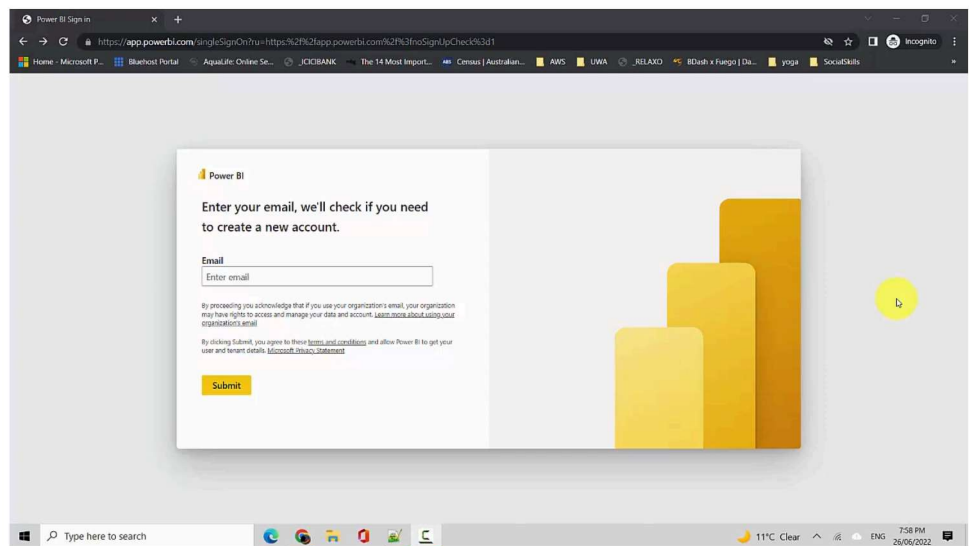

Step 3: The Power BI Home welcome window opens. Click **Try free** button.

Step 4: Click Start trial.

Step 5: The trial version is available 60 days.
